

PRODUCT DESCRIPTION

802 series are surface protection tapes suitable to protect metal and plastic surfaces during mechanical processes, storage, and transportation. These products consist of a PE film in various colors, coated with a pressure sensitive rubber-based adhesive.

SPECIFICATIONS

Colour	Clear
Nominal Thickness:	3 mils
Adhesion:	5 oz/in
Tensile Strength:	250 %
Elongation:	250%

PERFORMANCE FEATURES

These products protect the substrate till the end of the supply chain against scratches and impurities. The rubber-based adhesive is pressure sensitive and gives a medium adhesion level. These tapes have enough oil resistance and therefore usable to protect metals after milling operations.

RECOMMENDED END APPLICATIONS

802 series are ideal products to protect metal surfaces such as stainless steel, anodised aluminium, coated metals, and plastic substrates such as PMMA, Polystyrene, PVC and PC

DISCLAIMER

The physical properties listed above are typical values and are not to be construed as specifications. Our suggestions and recommendations for use are based on tests we believe to be reliable. However, the purchaser must determine the suitability of the product for their intended use. Protective Packaging assumes no liability for claims beyond the replacement value of our product proved to be defective.
