

PalletMask PM-12

PRODUCT DESCRIPTION

PalletMask, known as PM-12, is a high tack protective paper masking. Spray adhesives are sticky, messy, and build up; PM-12 contains the mess, removes easily, and ensures a fresh, smooth surface for every print run. Using a pallet mask tape also extends the overall life of the platen. Its high tack adhesive bonds well to the surface so the edges won't lift, but it still removes cleanly and easily.

SPECIFICATIONS

Colours:	White
Nominal Thickness:	4.2 mils
Adhesion:	7 oz/IN
Tensile Strength:	20lb/in (88N/25mm)
Elongation:	3%

PERFORMANCE FEATURES

Medium tack helps remove easily from platens. Reduces pallet cleanup and extends pallet life. Economical choice

RECOMMENDED END APPLICATIONS

PM-12 is a medium tack paper tape designed for use in textile screen printing to protect the platens from spray adhesive build-up. PM-12 eliminates the need for costly solvents and rag disposal.

DISCLAIMER

The physical properties listed above are typical values and are not to be construed as specifications. Our suggestions and recommendations for use are based on tests we believe to be reliable. However, the purchaser must determine the suitability of the product for their intended use. Protective Packaging assumes no liability for claims beyond the replacement value of our product proved to be defective.
